

VIDEO TASK DESCRIPTION

You will work together in assigned teams to create a video that details all specific aspects while working on your projects.

The **presentation must be in English** and should **include photographs** taken everyday while working on your projects as well as **screen shoots of the accomplished tasks**.

Your video might include music, graphs and visual effects as well, be creative!

The final video project should be recorded in a **common movie format**. You can use one of the following **applications to record your video** project or any other you manage to control (Microsoft Video Movie Maker, PowToon, Vivavideo, etc...) . **All members of the group must participate and speak in English**.

As an idea introduce the members of the group at the beginning of the recording presenting your project.

Check out the [PDF document "Rubric video assessment"](#) to see with which aspects your video will be evaluated.

Don't forget to create a new folder inside your project folder, with the name "Imatges" and save all the photos you take there.
